William Crossen

A FAMILY OF PACKAGING

WINE

COLLECTION

INTRODUCTION

Founded by a wine merchant in 1872, Croxsons has built a proud 145 year history with their intricate involvement with the wine industry. This lasting connection with the industry has strengthened throughout the decades and has made Croxsons a trusted partner with some of the world's biggest brands.

Our latest wine collection has been developed specifically with customer involvement and we are proud to present our own models to accompany some European classics. With strong supply chain relationships spanning over 80 years, we take the packaging headaches away from our customers and transform your bottle to represent your brand.

CLOSURES

For every wine bottle, there's a perfect closure. That's why we offer possibly the widest range of them from Europe. And with the right one in place, you can not only make your brand stand out from its competitors, you can also make it stand out full-stop. It's all part of our family of packaging.

NATURAL CORKS

Natural wine corks are the choice of winemakers looking for a combination of visual appeal, neutrality and consistent sealing qualities. The innovative cleaning processes used produce corks that exceed industry standards, ensuring that potential TCA and other off-aroma molecules are removed from the cell structure of natural cork.

We offer a wide range of cork grades, from near perfection for wines that demand nothing but the best, through to value priced corks intended for high-volume brands. Each is available in different washes, standard and custom lengths, as well as a choice of decoration.

For the wines that require absolute guarantee over TCA, we can offer a fully automated individual testing process which delivers 100% TCA free corks. Simply ask for more information.

CAPSULES AND CAGES

Croxsons offer a range of capsules suitable for premium, standard and value finishes. For a high quality product, a tin capsule offers the finest finish and opening experience where touch is everything. Let the consumer hear and feel the tearing of the metal as an allure to what lies within.

Poly laminate capsules are a blend of aluminium and polyethylene, bringing together a high visual impact and provides plenty of decorative potential with an attractive pricing position. PVC capsules are the simplest method for a wide range of bottles. With different decorative options, these offer a cost-effective and easy to apply solution. We stock a range of capsules in each material, alongside a comprehensive bespoke offering.

ROPP

For the markets that demand a ROPP solution, we have you covered. Croxsons offer both stock and bespoke ROPP caps in a range of sizes, with both EPE and SaraTin liners.

Easy to open, these screwcaps keep the flavours and freshness of the wine and prevent premature wine oxidation. It's everything you'd expect and more.
