INTRODUCTION

At Croxsons, we've been involved with the beer industry since 1872.
It's a lasting relationship that's still going strong today.

We believe our range of bottles are right up there with the best. It's why we're trusted by some of the leading beer brands – in all corners of the world.

Many bottles that we stock are integral to the breweries we are proud to call customers. Some order hundreds of thousands; others take advantage of our minimum order of just one pallet. But whatever your size or scale, you can really count on us.

SWINGTOPS

For a luxury finish, a brewer cannot go wrong with a SwingTop. Available in both ceramic and plastic from stock, printed and your own colours are available to order with a minimum order quantity.

For more information
croxsons.com/closures

CLOSURES

For every great bottle, there needs to be a suitable closure. As the very opening for a consumer to get the contents, this is often an underutilised opportunity to create a sense of occasion or an opportunity to create genuine brand-standout.

We ensure exactly that for brewers of all sizes. Whether you're a micro or a large multinational, finding the right marriage between your container and contents is a challenge we love to take on.

In fact, we sell in excess of 75million crowns every year. It's a reassuring statistic. With the capacity to handle multiple colours of the same design, the ability to mix and match colours on a single pallet, and printed crowns available from an accessible 50,000 units, Croxsons can offer all kinds of options when supplying closures for beer bottles.

From swing-stoppers – both plastic and ceramic – to the more exquisite cork and cage, finding the right opening experience for your customers is where we excel.

A choice of 15 colours or we can make a special colour for you.

Printed crowns with liners for illustrating your brand identity outside and inside.

Plain or printed ceramic stoppers with rubber seals and strong metal clasps.

4 PINES - CASE STUDY

We've been working with 4 Pines Brewing Co. - a fantastic craft brewer in Sydney, Australia - for around five years. Adapting a UK design but producing closer to their shores, we use innovative logistics solutions to facilitate a flexible way of working. We have seen them grow from a small micro-brewer to now one of the leading lights of the Australian craft beer scene.

We have fostered a relationship that keeps forecasting, production and logistics in sync between us, and both reap the benefit from having a long-term partnership. This is a great example of how we not only understand our clients' needs, but are also proactive in supporting their brand. As well as staying ahead of the curve with innovative design opportunities, we love being able to adapt our supply chain to offer responsive logistics and accommodate production demand spikes.
